

**Ball Lock Pins** • self-locking, with standard handle, titanium

---

22390.0028

## Product Description

Ball lock pins made from titanium stand out due to the following positive material features:

- Over 40% lighter weight compared to a steel variant
- Absolutely corrosion resistant.

The version made from titanium is used in areas such as lightweight construction, maritime environments and chemical manufacturing.

For quick fastening, locking, adjusting, changing and securing. Quickly and easily unlockable for frequently repeated connections.

Compact design with standard handle.

### Material

#### Pin part

- Titanium

#### Ball

- Ceramic

#### Spring

- Corrosion resistant alloy

### Operation

The balls are unlocked by pressing the button.

### More information

#### Notes

Customized design on request.

#### Accessories

Can easily be fitted with retaining cable EH 22400.

#### Further products

- Ball Lock Pins, self-locking, with standard handle
- Retaining Cables
