

## Lateral Plungers · with plastic spring and pin - INCH EH 2B150.

### Product Description

To be used for positioning and applying pressure, e.g. during painting and sandblasting.

#### Material

##### Body

- Aluminium Al

##### Spring

- plastic

##### Pin

- Steel, case-hardened, blackened
- Stainless steel
- Thermoplastic POM, white

#### Assembly

Installation by pressing in.

Formula for calculating the center distance for the mounting hole:

$$l_0 = z/2 + w + x,$$

$l_0$  = center distance,

$y$  = workpiece height,

$w$  = workpiece length,

$x$  = coordinate dimension,

$s$  = stroke,

$z$  = stop diameter

Calculation dimension  $x$ :

$y$  greater than or equal to  $l_2 - d_2/2$ ,

then  $x = d_2/2 - s$

(value  $x$  for this case see table)

or

$y$  smaller than  $l_2 - d_2/2$ ,

then  $x = d_2/2 - s - [(l_2 - d_2/2 - y) * 0,123]$

#### Characteristic

Version light spring load = blue spring

Version standard spring load = red spring

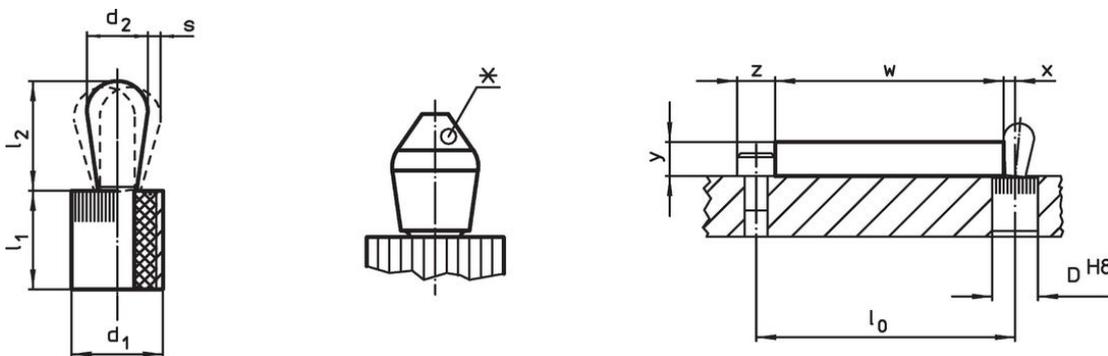

Version heavy spring load = green spring

#### More information

#### Notes

This is a discontinued article.

### Drawing

\*some sizes (see chart) have a deviating pin shape

### Order information

<sup>1)</sup> statistical average value

<sup>2)</sup> If the workpiece height ( $y$ ) is less than  $l_2 - d_2/2$ , the coordinate dimension ( $x$ ) must be calculated.

<sup>3)</sup> deviating pin shape (see drawing)
